Why Webshop Extra?

Our Webshop Extra Module integrates Sage software and e-commerce websites efficiently and seamlessly, providing the ability to easily process orders and manage online inventory.

Features:

- ✔ Populate an e-commerce website with product information, including stock levels and pricing.
- ✔ Scheduled, full and incremental uploads of data from Sage accounting solutions.
- ✔ Download web orders in real-time with payment confirmation into Sage accounting solutions
- ✔ Send despatch details and order tracking information back to website to keep customers
- ✔ Fully automated system - No additional external software or user interface required.
- ✔ Compatible with popular e-commerce platforms including Magento and X-Cart.
