# FastDespatch

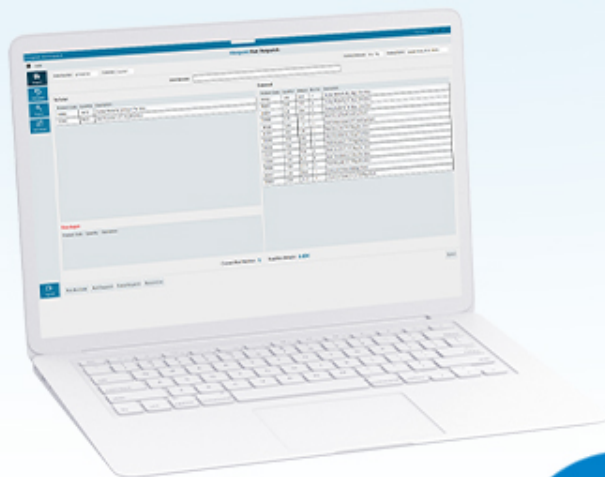

by Kinspeed

# FastDespatch

Our “Fast Despatch” system/application allows goods to be picked, packed, checked, weighed and catch weighted, resulting in the right product being processed to the right customer, in the right quantity, first time!

# key features

---

## Batch and Serial Control

Double-checks at picking and despatch stages ensure that no unusable product ever reaches your customer.

## Invoices based on weight, not the number of total items

Works with catch weighted product.

## 100% accuracy

Reduces picking errors and costly returns.

## Real-time Information

With integration between systems, we ensure your data is always available in real-time, including dashboard presentation.

## Complete traceability from picking, right through to packing

## Scanner Integration

# additional features

---

 Compares physical weights against calculated weights, including box tolerances

 Calculates the box weights in-line with carrier limits, reducing overweight surcharges

 Check sell-by dates and serial numbers

 Runs across multiple terminals

 Supervisor override feature

 Compatible with Sage ERP Systems/Products

# automated order processing & full carrier integration

---

We have proven solutions that accept orders from your customers in a variety of different sources and formats; from EDI, FTP to mail parsing and AWS.

Speed up despatch with direct links to major carriers such as FedEx, Royal Mail & TNT and software such as MetaPack.

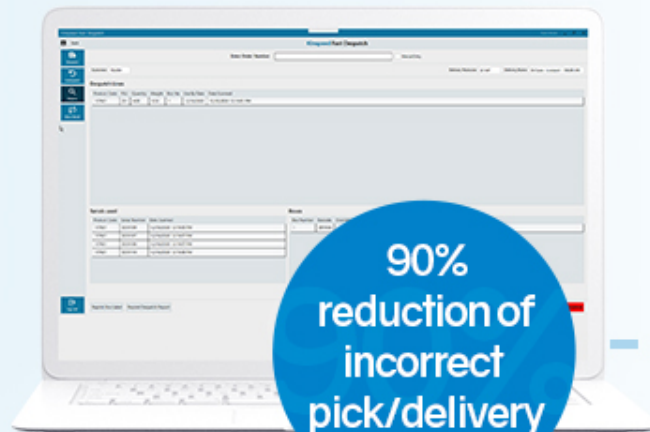

# case study

Underwood Meat Company are a long established, Rotherham based supplier and wholesaler of Fresh Meat products.

Due to multiple complicating factors, Underwood were running at a 20% error rate.

Fast Despatch provided a custom-designed Sage 200 integration that makes distribution of fresh, weighted products 100% foolproof. Thanks to Kinspeed's solution, Underwood can guarantee customers will receive the right product, at the right time, every time.
