what we do

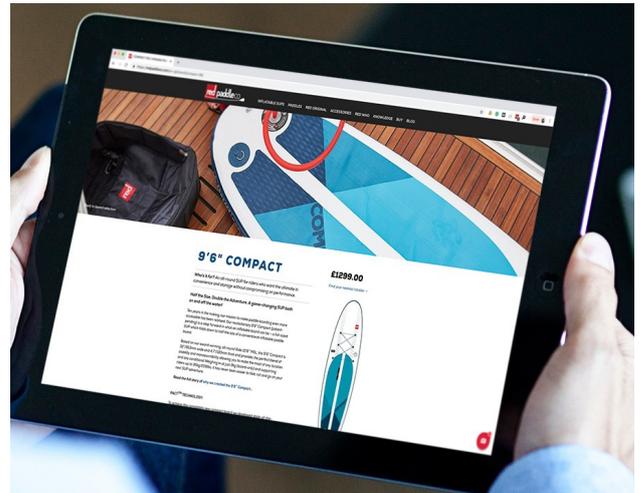

NetSuite Developer

We are experienced in selling, installing and developing your NetSuite solution. NetSuite is fully customisable, and Kinspeed can provide your perfect solution through a combination of SuiteApps and bespoke development.

Experts in e-commerce

We specialise in creating e-commerce websites, and also bringing website orders in to your system via our integration tools. Many companies over the years have benefited from our vast experience in this market and are now running web sites turning over millions of pounds.

NetSuite Operational Security Features

NetSuite has met a host of audit and security standards including SOC 1, SOC 2, PCI-DSS and EU-US Privacy Shield framework. In addition, NetSuite has modeled its security and risk management processes according to National Institute of Standards and Technology (NIST) and ISO 27000 series of standards.

kinspeed specialisms

Magento

Development of websites using Magento e-commerce - used by thousands of retailers and brands.

Microsoft SQL

Browser based Database systems using SQL - one of the most widely deployed database platforms in the world.

ERP (NetSuite)

Consolidate day-to-day tasks and streamline processes across your organisation with a NetSuite ERP system.

EPOS

Reliable and easy to use EPOS software that seamlessly connects with your accounting solutions.

NetSuite

Encompassing ERP, financials, CRM and e-commerce; Oracle Netsuite is trusted by over 40,000 businesses.

Warehouse Management

Barcoding and warehouse management systems.

bespoke solutions

In addition to providing customers with appropriate products and services, we have the expertise to shape software to meet individual business requirements.

By using specialist and integrated systems for your industry, will help your business attract new customers, increase profits and stay ahead of the competition.

Our highly experienced development team are always available to provide bespoke solutions.

NetSuite

ORACLE
NETSUITE

The World's #1 Cloud Business Software Suite

NetSuite is the world's number one cloud business software suite (citation). Encompassing ERP, financials, CRM and e-commerce Oracle Netsuite is trusted by over 40,000 businesses.

The right solution for your business

NetSuite is engineered to scale with businesses as they grow and to streamline mission-critical processes. In turn, this allows them to continue focusing on what they do best and to react to new market opportunities swiftly and confidently.

Every Business Size

Solutions for large, mid-sized and small, fast-growing businesses.

Every Industry

Industry-specific functionality spanning a broad range of businesses.

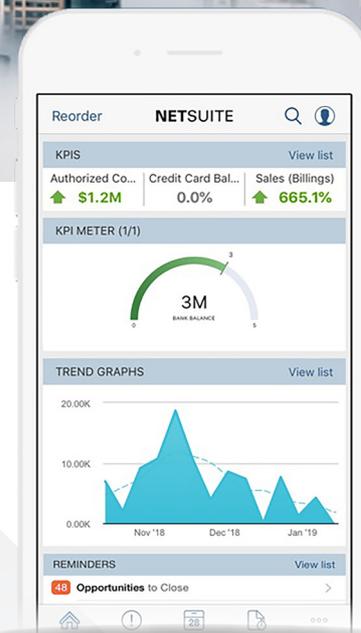

Current Software

Replaces QuickBooks, Sage, Microsoft Dynamics, SAP and other business systems.

SuiteSuccess

Premium implementation service allows zero to cloud in just 90 days.

Being a complete cloud solution, with over 20 years of experience and development within the solution, the system is perfectly suited for fast growing organisations, and it makes multi-company, multi-currency accounting a simple process.

NetSuite ERP

The world's most deployed cloud ERP solution

NetSuite ERP is a cloud based business ERP system which gives companies the tools they need to accelerate growth, drive innovation and minimise data entry.

Suite Commerce

NetSuite SuiteCommerce is a cloud-based e-commerce platform that easily adapts and scales to the unique selling and buying scenarios of your specific industry requirements, linking seamlessly in to your Netsuite ERP solution.

NetSuite Oneworld

A world leading ERP solution for companies working in multi-currency and/or multi-company environments.

It allows businesses to adjust for currency, taxation and legal compliance differences at a local level with regional and global consolidation and roll up. The genuine leader in its field, helping companies to achieve amazing growth.

NetSuite CRM

NetSuite CRM delivers powerful CRM capabilities, providing a full 360 degree view of all customers, via their own reports and dashboards, available anywhere you have internet access, ideal for when you are sat with your clients and need the data at your fingertips.

NetSuite Openair

Openair is a Professional Services Automation solution which supports your entire delivery lifecycle from projects management or time tracking to advanced billing or project accounting capabilities, with in depth reporting to ensure you are in full control of your operations at all times.

NetSuite Case Studies

Oracle NetSuite is used in many diverse sectors, in over 200 countries around the world, giving you the ability to achieve significant growth in a system that can adapt to your size and requirements.

Hammitt LOS ANGELES

“Data is the new gold, and NetSuite gives us the data we need to make fast decisions”

Hammitt is a luxury accessories brand based in Los Angeles selling in more than 350 boutiques nationwide as well as its flagship store in Las Vegas. Implementing NetSuite shortly after incorporating, NetSuite helps Hammitt manage manufacturer relationships, consumer commitments and boutique resellers, with a data-driven approach to growth.

ALTON * LANE

“NetSuite has given us a more holistic view down to the smallest details. This level of visibility was not possible with our previous systems.”

As a company built on superior products and customer service, Alton Lane found itself unable to access the kind of holistic, detailed view of its business needed to uphold its standards. A lack of integration was limiting visibility when what the company needed was anytime, anywhere access to the real-time data that would let it coordinate and collaborate across multiple locations and stakeholders.
